Description of the Power X-Change family, 1x18V battery required
Flexible battery box with integrated cable storage holder
Infinitely adjustable telescopic connection pipe
Flexible swan-neck with hose connection
Long cable connection for greater immersion depth
Powerful motor generates high delivery pressure
High-quality pump housing made of impact-resistant plastic
Easily accessible hose connection on top of the pump
Supplied without battery and charger (available separately)

Article description

The GE-PP 18 RB cordless submersible pressure and rainwater barrel pump is a high-performance member of the high-quality lithium-ion powered Power X-Change family. This pump is designed for a wide range of applications. Used as a submersible pressure pump with a long cable connection, e.g. in a cistern or well, and with the adjustable connecting pipe, e.g. in a rainwater container: For watering the garden independent of the mains supply - with flexibility in use and powerful operation. The high-performance motor generates a high delivery pressure of over 2 bar, making operation from a lawn sprinkler or spray gun no difficulty at all. The telescopic extension tube with a practical holder and the movable water connection with stopcock for positioning the garden hose to individual requirements is infinitely adjustable. The separate splash-proof battery box with a suspension device and wall-mounting facility is equipped with a practical cable storage holder on the housing. The high-quality pump housing and battery box are made of impact-resistant plastic. One 18 V rechargeable battery from the Power X-Change series is required for operation, which is not supplied with the product. The rechargeable battery and charger are available separately, for example as a practical starter set.

Technical details

Max. delivery height 20 m
Max. delivery capacity 3000 L/h
Max. immersion depth 4 m
foreign particle size 0 mm
Max. pressure 2 bar
Max. water temperature 35 °C
Connection pressure side 33,3mm (G1 AG)
